

Simtix Regulatory Readiness Report

Project: Riyadh Sukuk Platform

Industry: Tokenized Assets
Country: Saudi Arabia
Regulator: SAMA

Readiness Score: 72%

Simulation Statistics

Metric	Value
rules_evaluated	7000
rules_passed	5039
rules_failed	1961
critical_violations	420
high_violations	1495
medium_violations	46
low_violations	0
transaction_types	{'Deposit': 62, 'Buy Crypto': 82, 'Sell Crypto': 66, 'Transfer': 56, 'Bill Payment': 86, 'Card Paym
risk_distribution	{'Medium': 206, 'Low': 177, 'High': 117}
severity_distribution	{'High': 1495, 'Critical': 420, 'Medium': 46}

Executive Summary

The simulation results indicate a moderate overall compliance readiness score of 72 for the Riyadh Sukuk Platform, with particular strengths in AML (79) but notable challenges in the Tokenization module (57). A total of 7,000 rules were evaluated, with 1,961 failures, including 420 critical violations, primarily related to high-value transactions, incomplete KYC processes, and cross-border token transfer requirements. These violations highlight significant areas needing attention before regulator submission.

Risk Explanation

The primary risks stem from critical and high-severity violations across AML, KYC, and Tokenization modules. Key issues include unverified customer identities, incomplete onboarding, and non-compliance with AML thresholds, which could lead to regulatory sanctions or operational disruptions. The high number of violations related to cross-border activities and PEP status further elevates compliance risks, especially given the regulator's strict standards in Saudi Arabia.

Recommendations

- Prioritize resolving critical violations, especially those related to customer onboarding and AML thresholds, to mitigate severe regulatory penalties.
- Enhance KYC procedures to ensure complete customer verification and onboarding compliance.
- Implement stricter controls and review processes for high-value transactions and cross-border token transfers.
- Conduct targeted remediation for modules with lower scores, particularly Tokenization, to improve overall compliance posture.
- Engage with regulatory experts to review current policies and ensure alignment with SAMA requirements.
